

## Things a dentist can say, but not a gynecologist

- I need a good laugh today!! 😂😂😂
- I'll be finished drilling in just a minute.
- Gotta fill this big hole.
- Open wide
- That's quite a cavity...
- You have a large cavity.
- Hold on, you're gonna feel a little prick...
- I'll drill you now but it won't hurt a bit.
- I think it is about time to have these teeth replaced.
- Nice lips!
- Open wide
- It won't be long and I'll pull it out.
- Try not to gag
- Close your lips
- Relax, it's just a little prick
- Open up
- Ooohh yea!! You definitely need a filling
- Gargle and spit 😬
- "When's the last time you had a cleaning?"
- Bite!
- Never seen that before?
- How often do you brush and floss?
- Open wide! No wider!
- Let's just numb this area
- Just bite down on that.
- Open wide!!
- I can fill that cavity right now!
- Here's the mouthwash, and we're all done.

- This won't hurt a bit.
- You need to be cleaned every 3 months.
- Those gums are a mess.
- Rinse.
- That's a lot of buildup in there!
- "Stand up so I can see what it usually looks like."
- "Quit tightening up! I can't get in there!"
- It's clear that no one's been in here for a while.
- Rinse?
- Do you want me to fill the big hole or the small one first?
- If you took better care of your gums, you might still have some teeth...
- That's one big hole back there.
- These braces can come off any day now.
- Say 'ah'.
- You're gonna feel a little pinche... Not to worry
- I'm going to pull it out.☹
- That cavity is a lot bigger than I thought!
- How often do you floss?
- You need a crown
- Rinse and spit
- That's the biggest cavity I've ever seen
- Now spit it out!
- It needs to be pulled
- That's some cavity you've got.
- Spit.
- I'm going to put in a spreader
- Yes indeed, beaver hunting is my favorite sport.
- Hello!!! Anybody in there? I actually had a doctor say that during a pelvic exam when I was a teenager
- Gotta do a cavity search
- Have you decided whether you need that night guard replaced?
- I will have to do a little drilling
- That's the biggest cavity I've ever seen in my practice...
- Looks like you could use a cleaning
- As a dentist once said to me, "Oh God! Oh God! I should have sent you to hospital to get this one out." This was said while he was straddling me.
- It looks good in there.
- This hole needs filling.
- Do you floss regularly?

- Open wide, although I have said that to girlfriends
- That's quite a large cavity you have there!
- All the thirty two in here are permanent!
- Open wide! Swish and spit, don't swallow.
- This sounds like the things you hear on "Whose Line is it Anyway!"
- "I'm a dentist not Gynecologist ma'am"
- Is that a piece of Tootsie roll stuck in there?
- This is deeper than I thought. You definitely need this filled.
- It's worn down.
- "I'm going to need to do some scaling."
- How'd you get that plaque in there?
- Ok, now bite down...gently and grind!
- I'm pretty sure I can fit a bridge in there...
- You're going to need some laughing gas for this procedure
- I think I see China.
- Those implants are certainly helping
- Upper left number 2. Acclusal palative
- Floss is OK when you are 13.
- Spit
- Did you miss your last cleaning?
- You should see a hygienist
- About that root canal.
- That decay looks yellow and might need to be removed.
- Rinse
- Want me to pull it out?
- Need a root canal
- Open wide and say ahhh 🌿💧?
- Swallow ...
- I'm going to have to go quite deep here, so if it starts hurting, just raise your hand.
- Bite down.
- Do you grind at night?
- Old joke. A young woman says that she would rather have a baby than have a root canal. The dentist says, "Make up your mind. I need to know how to set the chair."
- Rinse and spit.
